Purpose

This document summarizes the results of tests conducted on the “Domino's Pizza” website in Israel. The focus was on essential functions like navigation, menu display, order placement, user registration, and other features.

The assessment is aimed to ensure a smooth user experience and proper functioning of key operations. The report provides insights into the website's performance, highlighting strengths and areas for potential improvement. This information is valuable for enhancing the overall functionality and user satisfaction on the Domino's Pizza website in Israel.

Application Overview

Introduction:

Welcome to Domino's Pizza, accessible on both web and mobile. It is designed for effortless browsing of the menu, making ordering for delivery or self-pick up a breeze. Whether you are craving a classic pizza or exploring our latest additions, Domino's Pizza ensures that ordering for delivery or self-pickup is an easy and enjoyable experience.

Key Features:

- **Browse Menu:** Easily explore the selection with a simple menu interface.
- **Place Orders:** Quickly order for delivery or choose convenient self-pickup.
- **User-Friendly:** Domino's Pizza is user-friendly, ensuring a smooth experience for users looking to order pizza, and track their order.
- **Accessible Anywhere:** Enjoy Domino's Pizza on your computer or phone, for a consistent experience across devices.
- **Reliable Orders:** Domino's Pizza efficiently manages orders, delivering a reliable service following company values.
- **Secure Transactions:** Rest easy-Domino's Pizza prioritizes your data security with strong safeguards.

Testing Scope

1. Functionality Testing:

1.1 Menu Browsing:

- Manually navigate through categories, products, and customization options.

1.2 Order Placement:

- Place test orders for delivery and self-pickup to verify the accuracy of the ordering process.

1.3 User Account Management:

- Test user registration, login, and account management features.

1.4 Payment Processing:

- Check the payment process for different methods.

2. User Interface and Experience:

2.1 Cross-Browser Testing:

- Manually test across various browsers to ensure a consistent user experience.

2.2 Responsive Design:

- Test website responsiveness on different devices (desktop, tablet, mobile).

2.3 Visual Checks:

- Conduct visual checks to ensure the website's layout, images, and text appear as intended.

2.4 Browser-Based Tools:

- Utilize DevTools and other browser extensions for analysis and debugging.

2.5 DevTools Analysis:

- Inspect and debug elements, network requests, and overall page performance.

3. Performance Testing:

3.1 Page Load Times:

- Use DevTools to analyze page load times and identify performance issues.

3.2 Network Throttling:

- Simulate different network conditions to assess website performance.

3.3 Load Testing:

- Evaluate the website's performance under various traffic loads by conducting thorough load testing.

3.4 Boundary Testing:

- Test extreme scenarios, such as large orders or simultaneous orders, to identify potential issues.

3.5 Caching Mechanism:

- Test the effectiveness of any caching mechanisms in place for faster loading times.

4. Security Testing:

4.1 Data Encryption:

- Check for HTTPS and ensure secure data transmission.

4.2 Form Security:

- Verify forms have proper validation and protection against security issues.

5. Accessibility Testing:

5.1 Manual Accessibility Checks:

- Manually review the website for basic accessibility considerations.

5.2 Automated Accessibility Audits:

- Use tools like Lighthouse for automated accessibility audits.

6. Content Validation:

6.1 Content Accuracy:

- Verify product details, prices, and promotional information accuracy.

6.2 Link Validations:

- Ensure all links and buttons lead to the correct destinations.

7. Cross-Device Testing:

7.1 Mobile Testing:

- Test functionality and layout on mobile devices.

7.2 Pizza Customization:

- Test toppings selection, limitations, special instructions, and order preview.

7.3 Compatibility:

- Confirm integration of customized pizzas with regular menu items.

8. User Experience:

8.1 Test error scenarios:

- Verify smooth user experience during error scenarios.

8.2 Performance:

- Assess loading times when adding/removing toppings.

8.3 Cross-Browser and Cross-Device Testing:

- Confirm consistency across browsers and devices.

9. Integration Testing:

9.1 Data Handling:

- Test if user-selected toppings persist throughout the ordering process.

9.2 Security:

- Ensure sensitive information is handled securely.

10. Usability Testing:

10.1 Collect Feedback:

- Collect feedback on the pizza customization feature.

11. Lighthouse Audits:

11.1 Performance Audit:

- Run Lighthouse audits to identify performance improvement opportunities.

11.2 SEO Audit:

- Use Lighthouse to check for basic SEO practices.

12. User Feedback:

12.1 Usability Testing:

- Collect feedback on the overall user experience.
- Identify pain points or areas for improvement in the user journey.

13. Internationalization:

- Test language preferences for multilingual support, specifically focusing on Hebrew, English, and Russian.
- Verify that users can easily switch between languages, and the content is displayed accurately in the selected language.
- Ensure that language changes are reflected consistently across the entire website, including menus, product details, and any other textual content.

14. Regression Testing:

- Periodically perform regression testing as new features or updates are introduced.

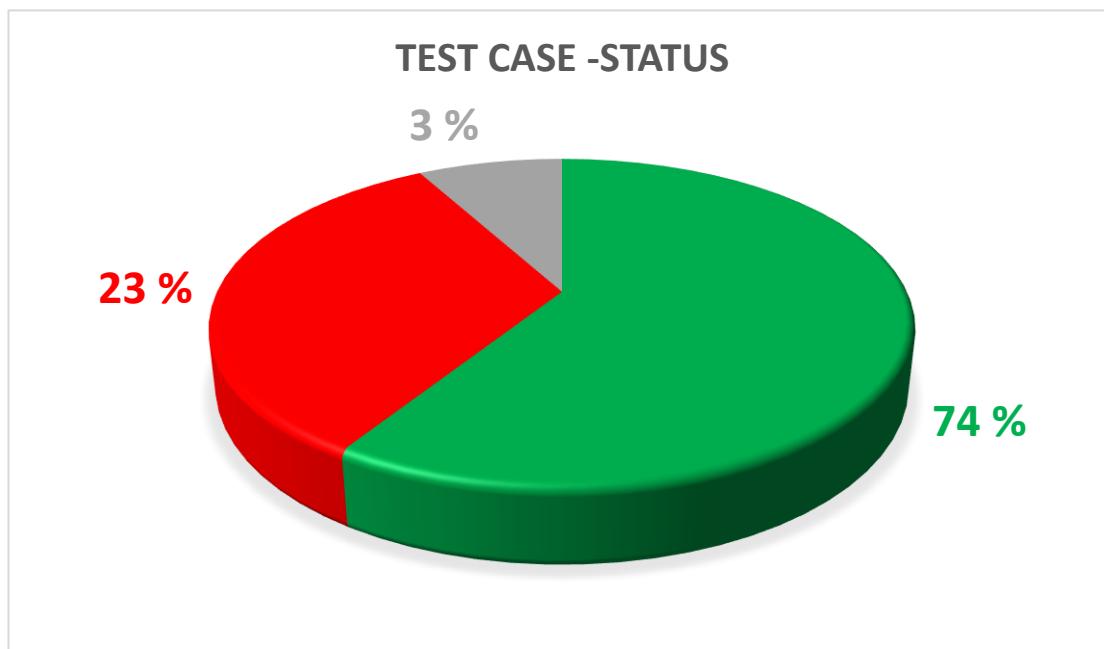

Metrics

Test cases – Status

This chart visually represents the outcome of website testing, indicating the number of test cases that either succeeded or failed.

Passed	Failed	Not run	Total
150	49	5	204

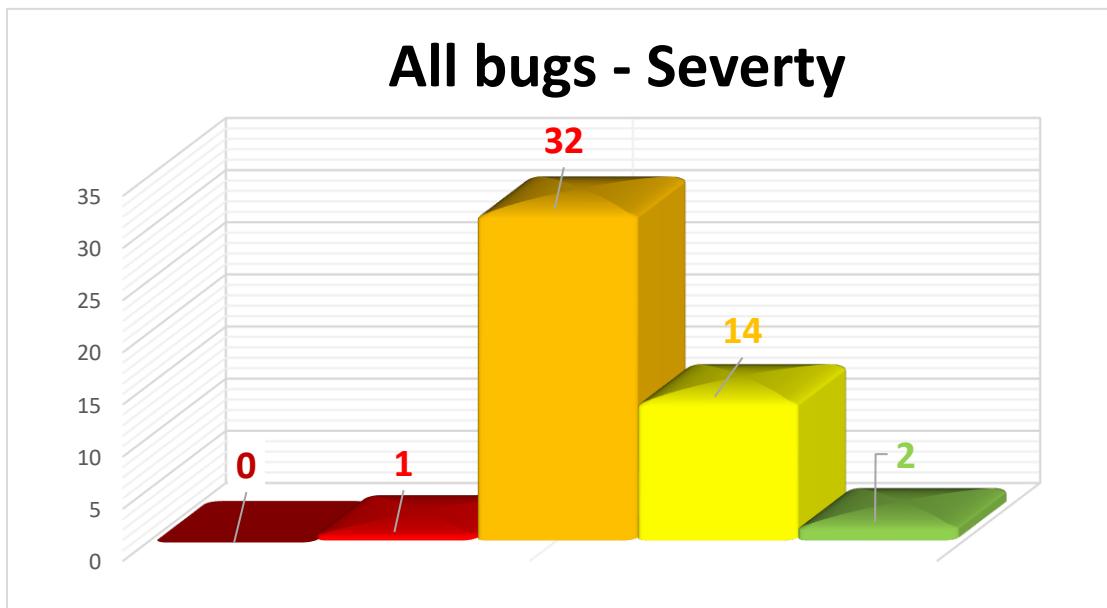

Severity Bugs – Status

This bar chart depicts the severity levels of identified issues within the Domino's Pizza website. The visual representation indicates that a significant portion of the reported bugs falls under the "Major" severity category, shedding light on the nature and distribution of issues encountered during the evaluation.

S1 - Show Stopper	S2 - Critical	S3 - Major	S4 - Minor	S5 - Low	Total
0	1	32	14	2	49

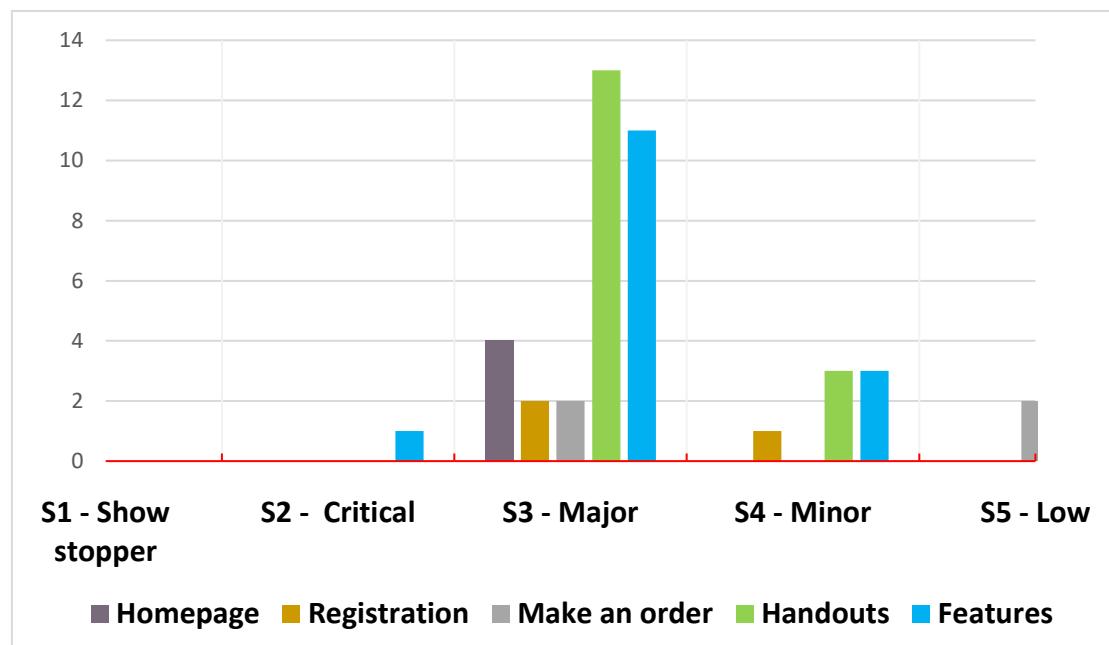

S1 – Show Stopper	S2 - Critical	S3 - Major	S4 - Minor	S5 - Low
-------------------	---------------	------------	------------	----------

Defect Distribution – Module Wise

This tabular chart displays the severity levels of identified bugs (on the left) alongside the corresponding test areas (at the top of the chart) where these issues were discovered. The structured layout offers a comprehensive overview, enabling a clear understanding of the bug severity distribution across different test areas.

	Home page	Registration	Make an order	Handouts	Features	Total
S1 - Show Stopper	0	0	0	0	0	0
S2 - Critical	0	0	0	0	1	1
S3 - Major	4	2	2	13	11	32
S4 - Minor	1	1	0	9	3	14
S5 - Low	0	0	2	0	0	2
Total	5	3	4	22	15	49

Types of Testing Performed

Functionality Testing:

- a) Menu Browsing:** Verify manual navigation through categories, products, and customization options to ensure a seamless user experience.
- b) Order Placement:** Conduct test orders for both delivery and self-pickup, validating the accuracy of the ordering process.
- c) User Account Management:** Test user registration, login, and account management features for functionality and security.
- d) Payment Processing:** Check the payment process for various methods, ensuring transactions are secure and accurate.

User Interface and Experience:

- a) Cross-Browser Testing:** Manually test across browsers to guarantee a consistent user experience.
- b) Responsive Design:** Assess website responsiveness on different devices (desktop, tablet, mobile).
- c) Visual Checks:** Conduct visual checks to confirm the website's layout, images, and text appear as intended.
- d) Browser-Based Tools:** Utilize DevTools and browser extensions for in-depth analysis and debugging.
- e) DevTools Analysis:** Inspect and debug elements, network requests, and overall page performance.

Performance Testing:

- a) Page Load Times:** Use DevTools to analyze page load times and identify and address performance issues.
- b) Network Throttling:** Simulate different network conditions to assess website performance under various circumstances.
- c) Load Testing:** Evaluate the website's performance under different traffic loads through comprehensive load testing.
- d) Boundary Testing:** Test extreme scenarios, such as large orders or simultaneous orders, to identify potential issues.
- e) Caching Mechanism:** Assess the effectiveness of caching mechanisms for faster loading times.

Security Testing:

- a) Data Encryption:** Verify HTTPS and ensure secure data transmission during user interactions.
- b) Form Security:** Confirm forms have proper validation and protection against security vulnerabilities.

Accessibility Testing:

- a) Manual Accessibility Checks:** Manually review the website for basic accessibility considerations.
- b) Automated Accessibility Audits:** Utilize tools like Lighthouse for automated accessibility audits to enhance inclusivity.

Content Validation:

- a) Content Accuracy:** Verify product details, prices, and promotional information for accuracy.
- b) Link Validations:** Ensure all links and buttons lead to the correct destinations.

Cross-Device Testing:

- a) Mobile Testing:** Test functionality and layout on mobile devices to ensure a seamless mobile user experience.
- b) Pizza Customization:** Validate toppings selection, limitations, special instructions, and order preview functionality.
- c) Compatibility:** Confirm the integration of customized pizzas with regular menu items.

User Experience:

- a) Test Error Scenarios:** Verify a smooth user experience during error scenarios for effective user support.
- b) Performance:** Assess loading times when adding/removing toppings to maintain optimal user experience.
- c) Cross-Browser and Cross-Device Testing:** Confirm consistency across browsers and devices for a seamless experience.

Integration Testing:

- a) Data Handling:** Test if user-selected toppings persist throughout the ordering process to ensure data integrity.
- b) Security:** Ensure sensitive information is handled securely to protect user data.

Usability Testing:

- a)** Collect Feedback: Gather feedback on the pizza customization feature to enhance overall usability

Lighthouse Audits:

- a)** Performance Audit: Run Lighthouse audits to identify opportunities for performance improvement.
- b)** SEO Audit: Use Lighthouse to check for basic SEO practices to improve search engine visibility.

User Feedback:

- a)** Usability Testing: Collect feedback on the overall user experience to identify areas for improvement in the user journey.

Internationalization:

- a)** Test Language Preferences: Focus on multilingual support, especially Hebrew, English, and Russian.
- b)** Verify Switching Between Languages: Ensure users can easily switch languages, and content is displayed accurately.
- c)** Consistent Language Changes: Confirm that language changes are reflected consistently across the website.

Regression Testing:

- a)** Periodic Regression Testing: Perform regression testing as new features or updates are introduced to maintain application stability.

Specific Features Testing:

- a)** Test Unique Features: Test any distinctive or specialized features present on the website.

Performance and Scalability:

- a)** Stress Testing and Scalability: Assess the application's performance under stress and ensure scalability.

Third-Party Integrations:

- a)** Thorough Testing: Conduct comprehensive testing of third-party integrations to ensure seamless functionality.

Mobile App Testing:

- a)** Scenario Testing: Test various scenarios for the associated mobile app to ensure smooth performance.

Security Penetration Testing:

Identify Vulnerabilities: Conduct security penetration testing to identify vulnerabilities and enhance security.

Performance on Different Devices:

a) Device Testing: Evaluate the website's performance on various devices with different screen sizes and resolutions.

Browser Compatibility:

a) Compatibility Testing: Ensure compatibility with the latest versions of major browsers (Chrome, Firefox, Safari, Edge).

Data Privacy Compliance:

a) Compliance Testing: Ensure compliance with data privacy regulations and conduct testing related to data protection.

Database Testing:

a) Data Integrity Verification: Verify the integrity of the database by checking data accuracy, consistency, and retrieval efficiency.

Concurrency Testing:

a) Multiple User Testing: Evaluate the application's ability to handle multiple users simultaneously.

User Authentication Testing:

a) Security Testing: Test the security of user authentication mechanisms.

Error Handling Testing:

a) Error Scenarios: Assess how the application handles unexpected errors and provides meaningful error messages to users.

Session Management Testing:

Session Handling: Test the creation, maintenance, and termination of user sessions.

Cross-Site Scripting (XSS) Testing:

a) Security Enhancement: Identify and mitigate vulnerabilities related to cross-site scripting attacks.

Cross-Site Request Forgery (CSRF) Testing:

a) Resistant Testing: Test the application's resistance against CSRF attacks.

Load Balancing Testing:

a) Effectiveness Testing: If applicable, test the effectiveness of load balancing.

API Testing:

- a)** Functionality and Security Testing: Test the functionality, reliability, and security of APIs.

Localization Testing:

- a)** Content Localization: Verify that the application displays content correctly for different locales.

Data Integrity Testing:

- a)** Database Testing: Validate the accuracy and consistency of data stored in the application's databases.

Cookie Testing:

- a)** Cookie Handling: Verify the creation, management, and deletion of cookies.

Compliance Testing:

- a)** Regulatory Compliance: Ensure that the application complies with relevant industry standards, legal requirements, and regulations.

Backup and Recovery Testing:

- a)** Process Testing: Test the backup and recovery processes to ensure data safety and business continuity.

Recommendations

1. **User-Friendly Menu:** Give users the option to order without the need to register.
2. **Faster Loading Times:** Optimize the home page for faster loading, ensuring a smoother and more responsive experience.
3. **Clear Navigation Challenges:** Address the existing challenge of finding language options on the site. Make language choices (English, Russian, Arabic) more conspicuous on the homepage to enhance accessibility, thus creating a happier experience.
4. **Streamlined Homepage:** Clearly identify and resolve the issue of repeated content on the homepage, ensuring an efficient menu for a simpler navigation experience. Address the common issue of repetitive content throughout the site, particularly on the homepage. Simplify the menu to provide users with an efficient and more enjoyable navigation experience. This enhancement will eliminate confusion and improve the overall usability, making it easier for visitors to find what they are looking for without unnecessary repetition.
5. **Visual Upgrade without Clutter:** Enhance the website's appearance by introducing a fixed background and decluttering busy elements. Simplifying the overall design will make a cleaner and more visually appealing site.

Best Practices

During the testing project, many activities were done by the Testing team, aiming to enhance efficiency. Several practices proved to be time-saving and effective methodologies. Examples of value-added practices include:

Comprehensive Test Planning:

Detailed test planning streamlined objectives, optimizing the testing team's efficiency.

Focused Functionality Testing:

Emphasis on critical operations like menu browsing, order placement, and payment processing ensured a thorough examination of key functions.

Cross-Browser and Cross-Device Testing:

Extensive testing across browsers and devices guaranteed a consistent user experience.

Performance Optimization:

Performance testing, load testing, and boundary testing identified and addressed performance opportunities.

Accessibility Considerations:

Manual and automated accessibility checks enhanced accessibility for users with diverse needs.

Content Validation and Link Integrity:

Ensured accurate content and validated links for a reliable user experience.

Cross-Device Pizza Customization Testing:

Thorough testing of pizza customization on various devices ensured a smooth user experience.

User Experience Testing:

Covered error scenarios, loading times, and consistency checks across browsers and devices.

Integration and Usability Testing:

Integration testing focused on data handling and security, while usability testing gathered feedback for improvement.

Internationalization Testing:

Multilingual support and language preferences cater to a diverse user group.

Regression Testing:

Periodic testing, maintained application stability during new features or updates, ensuring a reliable user experience.

Exit Criteria

Finish Testing:

Ensure all planned tests are done.

Meet Objectives:

Ensure testing goals are achieved.

Fix bugs:

Confirm and close any reported issues.

Complete Documents:

Finish all documents including STR.

Get Approval:

Get approval from Project Manager.

Meet Quality Standards:

Ensure project meets set Quality Standards.

Conclusion - Go

After evaluating the 'Domino's Pizza' website, testing identified several bugs, the majority of which fall within the low to major severity range. It is important to note, however, that despite these issues, the website continues to perform reasonably well, successfully fulfilling its core functions of displaying the restaurant menu and facilitating orders for delivery or self-collection.

Given the context of these identified bugs, I recommend a cautious approach to moving forward with the website release. By making the website publicly accessible, the goal is to meet immediate objectives and effectively serve users.

Despite identified bugs, the 'Domino's Pizza' website is recommended for release, emphasizing essential features, and meeting immediate user needs.

Bugs List

[DP-49] Incorrect error message on the login page when typing incorrect email and password

[DP-48] Missing Apt.# field on the delivery form

[DP-47] Domino's Pizza home page loads too slow

[DP-46] No limit to the number of toppings on a pizza

[DP-45] Incorrect information on the "סניפים" page

[DP-44] Dropdown with no information under it on the "עזרה" page

[DP-43] Text is cut off on the "עזרה" page under "דף קטגוריה" category

[DP-42] Cannot start chat to speak to representative on the "יצירת קשר" page

[DP-41] Cannot start chat to speak to representative on the "יצירת קשר נגישות" page

[DP-40] Three different styles and size fonts on the "תקנון האתר" page

[DP-39] Black font on the dark background make difficult reading on the "מי אנחנו" page

[DP-38] Black font on the dark background make difficult reading on the "פיצה טבעונית" page

[DP-37] Different size fonts on the "פיצה מרגיטה" page

[DP-36] Font size is larger than other pages on "תוספות לפיצה" page

[DP-35] Font size is smaller than other pages on "פיצה אישית" page

[DP-34] Font size is different from other pages on "פיצה דקה" page

[DP-33] Hard to read text on the "מדיניות פרטיות" page

[DP-32] Difficult to read on the "הצחת נגישות" page

[DP-31] Misspelling of the name on the link "כיף בדומינו" on the "דרושים" page

[DP-30] No access to the logo on "כיף בדומינו" page

[DP-29] No access to the logo on "מסלול קידום" page

[DP-28] No access to the logo on "הגשת מועמדות" page

[DP-27] No access to the logo on "קצת עליינו" page

[DP-26] The "תפריט" link on the Domino's pizza homepage opens the wrong page (pizza lover) instead

[DP-25] Registration with Invalid information

- [DP-24] No limit to the amount of input in the "מספר בית" field on the page
- [DP-23] Text should not be allowed in phone number field on the "Tracker" page
- [DP-22] Place an order 9 years in advance on the "אירועים וחברים" page
- [DP-21] The logo on the "סדנאות שף עיר" does not open the homepage for Domino's Pizza
- [DP-20] The link "סדנאות שף עיר" opens in the same tab when it should open in a new tab
- [DP-19] Verification of submitting the registration form with invalid data on the "דף פיצה עיר" page
- [DP-18] The resolution on the sign-up form page in the "סדנאות שף עיר" page is too high
- [DP-17] The resolution on the "סדנאות שף עיר" page is too high
- [DP-16] The video link on the "מסלול קידום" page in the "דרושים" section does not play
- [DP-15] Handling of Invalid Form Submission Domino's Pizza Job Application
- [DP-14] The Domino's Pizza logo on the "ערכים תזונתיים" page does not take you to the home page
- [DP-13] The link one the "ערכים תזונתיים פיצה להזמנה" page takes you to the homepage
- [DP-12] The link for "להורדת האפליקציה" opens to the home page
- [DP-11] The resolution on the "ערכים תזונתיים" page is too high
- [DP-10] The link for "ערכים תזונתיים" opens the wrong page
- [DP-9] Missing WhatsApp icon on the "יצירת-קשר-הזמנות-גדולות" page
- [DP-8] Incorrect spelling on the "הצורת נגישות" page
- [DP-7] Incorrect city name on the "הצורת נגישות" page
- [DP-6] Hard to read text due to black colored text on black background on the "הצורת נגישות" page
- [DP-5] No limit to the amount of input in the Reference details on the "אירועים וחברים" page
- [DP-4] the link "sofar-brnd" does not work
- [DP-3] The link "דרושים" opens in the same tab when it should open in a new tab
- [DP-2] The link "ערכים תזונתיים" opens to the wrong page

[DP-1] The page "אירועים וחברים" opens in the same tab when it should open in a new tab

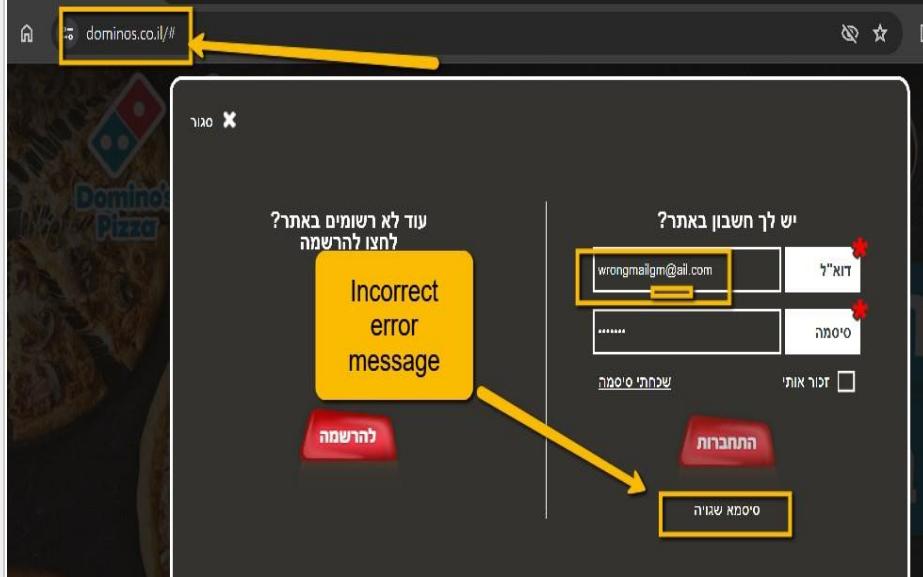

Bugs

[DP-49] Incorrect error message on the login page when typing wrong email and password Created: 14/Jan/24 Updated: 14/Jan/24

Status:	To Do
Project:	Domino's Pizza
Components:	None
Affects versions:	None
Fix versions:	None

Resolution:	Unresolved	Votes:	0
Labels:	None		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		
Original estimate:	Not Specified		
Environment:	Browser: 1. Chrome 120.0.6099.130 2. Firefox 121.0 3. Edge 120.0.2210.121 Resolution: 1. 4096 x 2160 2. 1920 x 1080 3. 1600 x 900		

Attachments:	 A screenshot of a web browser displaying the Domino's Pizza login page at https://www.dominos.co.il/# . The URL is highlighted with a yellow box and an arrow. The page shows a login form with fields for email and password. An error message box is prominently displayed in the center, containing the text "Incorrect error message". The background of the page is dark, and there are some Hebrew text elements like "להרשמה" (for registration) and "התחברות" (login).
Severity:	S4 - Minor

Description

Steps for reproducing:

1. Open URL <https://www.dominos.co.il/#>
2. In the navigation bar click on “שלום PIZZA LOVER”
3. Type in incorrect email (wrongmailgm@ail.com)
4. Type in wrong password (wrongpassword)
5. Notice the error message

Actual result:

Receive error message “סימנה שגויה”

Expected result:

Should receive error message “סימנה וכתובת מייל שגויה”

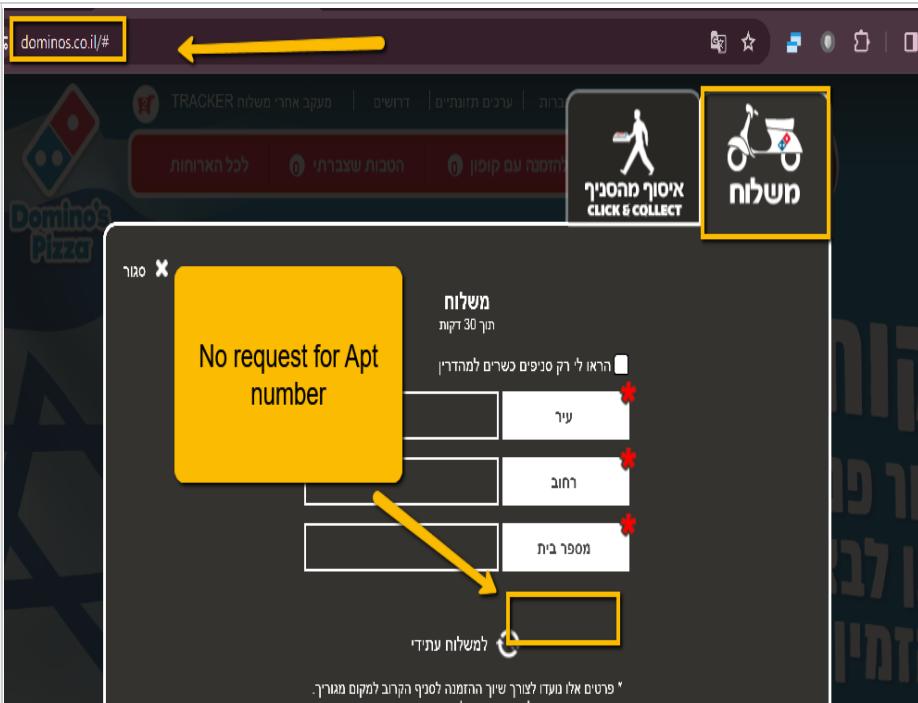

[DP-48] Missing Apt.# field on the delivery form Created: 14/Jan/24 Updated: 14/Jan/24

הזמנה עבירה לנינף אך ברגע לבע בה שני. אין עושים זאת?

הכנתות של לא קיימת. מה עושים?

מhn שעת הפתיחה של הסעיף?

מי' הזמנה עתידית?

אם ניתן להזמין את המבצעים שבאותם גם בטלפון?

כ', יש גם פיצה ללא גלוטן!

אפשר גם טבעוני!

פיצה אישית

תוספות לפיצה

פיצה מרגריטה

פיצה טבעונית

סדנת שף צייר

-domים'ם, הקהילה

מי' אתם

פיצה נטה בדומינו'

פיצה עתונה בדומינו'

תקין עתורה

עוררה

חדש

Severity:	S3 - Major

Description

Steps to reproduce:

1. Open URL <https://www.dominos.co.il/>
2. On the bottom of the page click on the link "הצהרת נגישות"
3. In the menu on the right side click on "עזרה"
4. Click on "אפשר גם טבעוני"
5. Notice the lack of any information

Actual result:

When clicking on the dropdown the page gives a little jump indicating the intent of text but there is nothing there

Expected result:

The dropdown should open and show all information about the vegetarian menu

[DP-43] Text is cut off on the "עזה" page under "בן, יש גם פיצה ללא גלוטן!" category

	 <p>The screenshot shows a dropdown menu from a Domino's website. A yellow box highlights the URL bar with the address "dominos.co.il/#עוגה". A yellow arrow points from this box to a yellow button labeled "Click here". Another yellow arrow points from the "Click here" button to a yellow box containing the text "Text is cut off". The dropdown menu lists various pizza options in Hebrew, such as "פיצה מושפעת", "פיצה אישית", and "פיצה טבעונית". The last item in the list, "תקין אגר", is also highlighted with a yellow box.</p>
Severity:	S3 - Major

Description

Steps to reproduce:

1. Open URL <https://www.dominos.co.il/>
2. On the bottom of the page click on the link "הצהרת נגישות"
3. In the menu on the right side click on "עזרה"
4. Click on "כן יש גם פיצה ללא גלוטן!" link
5. Notice the text is cut off

Actual result:

The text is cut off therefore you cannot read the information there

Expected result:

Should be able to read all text comfortably

Screenshot of the Domino's Pizza website showing a bug related to the chat feature.

The top screenshot shows a form for ordering pizza. A yellow callout box points to the "שלחו" (Send) button at the bottom right, with the text "Click on this to chat with representative". Another yellow callout box points to the "שירות לקוחות" (Customer Service) link in the sidebar menu.

The bottom screenshot shows the customer service interface. A yellow callout box points to the "חדש" (New) tab in the message list, with the text "Can't start a chat".

Severity:	S3 - Major
------------------	------------

Description

Steps to reproduce:

1. Open URL <https://www.dominos.co.il/>
2. On the bottom of the page click on the link "הצלה נגישות"
3. In the menu on the right side click on "שירות לקוחות"
4. On the bottom of the page click on "לפניה לשירות לקוחות לחוץ הארץ"
5. Notice the "שיחה חדשה" tab is faded and not clickable

Actual result:

The “שיחת חדשה” button is faded and not clickable so you cannot start a chat with a representative

Expected result:

Should be able to click on the “שיחת חדשה” in order to start chat with representative

Resolution:	 1. 4096 x 2160 2. 1920 x 1080 3. 1600 x 900		

Attachments:	 27.mp4
Severity:	S3 - Major

Description

Steps to reproduce:

1. Open URL <https://www.dominos.co.il/>
2. On the navigation page on top click on "דרושים" "קצת עליות"
3. Click on "קצת עליות"
4. Hover over the logo notice how it is inaccessible

Expected result:

The logo should be on the top left side of the page so that accessibility icon will not interfere with it

Actual result:

The logo is on the right side and gets covered by the accessibility tab not allowing access to the logo thus making it difficult to navigate back to the home page

[DP-26] The "תפירת" link on the Domino's pizza homepage opens the wrong page ([תפירת שלום](#) (pizza lover)) instead

**Attachments:**

The screenshot shows the homepage of the Domino's Israel website (<https://www.dominos.co.il/>). A yellow callout box highlights the URL in the address bar. Another yellow callout box highlights the text "Home page". A yellow arrow points from the URL callout to the "Home page" callout. A third yellow arrow points from the "Home page" callout to the footer area where a yellow box highlights the "תפריט" (menu) link.

The screenshot shows the login page of the Domino's Israel website (<https://www.dominos.co.il/#>). A yellow callout box highlights the text "Not the menu page". A yellow arrow points from the "Not the menu page" callout to the URL in the address bar. The right side of the page shows a login form with fields for "דואיל" (Email) and "סיסמה" (Password), both marked with red asterisks indicating required fields. There is also a checkbox for "זכור אותי" (Remember me).

Severity:	S3 - Major
------------------	------------

Description

**Steps to reproduce:**

1. Open URL <https://www.dominos.co.il/>
2. On the bottom of the page click on “תפריט”
3. Notice the page that is opened is the incorrect page

Actual result:

The sign in/sign up page is opened instead of the menu page

Expected result:

The menu page should be shown

Attachments	dominos.co.il
	<p>The screenshot shows the Domino's Pizza website homepage in Hebrew. At the top, there's a navigation bar with the URL 'dominos.co.il'. Below the URL is the Domino's logo. To the right of the logo is a red button labeled 'TRACKER' with a small bell icon. Further right are links for 'זרושים' (Reviews) and 'זונתיים' (Promotions). On the far right, there are two circular icons with the number '0' and a magnifying glass icon.</p> <p>In the center of the page is a large image of a pizza. Overlaid on the pizza is a delivery tracking interface. It shows a timer starting from 9:00 and counting down to 5:11. Below the timer, it says 'מאות חטפים על ידי החמאס' (Hundreds of kidnaps by the hamas) and 'מחזירים אותך להונית שניות' (Return you to your home seconds). There are arrows pointing left and right under the timer.</p> <p>To the right of the pizza image is a blue promotional box. It contains text in Hebrew: '50% הנחה על כל התפריט לחייבים, כוחות הביטחון והוצאה/cmd' (50% discount on the entire menu for obligors, security forces, and the military). Below this, it says 'בקנייה טטנים גאנז' (Ganz Delivery). At the bottom of the box is small text: 'לawn לחישות זיכוי גניזה וגהילה בזרכן נזך. גאנז בטליפקס: 31.12.23' (Lawn for tax deduction of waste and recycling in incineration. Ganz via fax: 31.12.23).</p> <p>At the bottom of the page, there are two buttons: 'לכל הארכות' (For all addresses) and 'סדנאות שף צער' (Chef's workshop). A yellow box highlights the 'סדנאות שף צער' button. To the right of the 'Chef's workshop' button is a Google Play logo.</p>

Description

Steps to reproduce:

1. Open URL to <https://www.dominos.co.il/>
2. On the higher navigation bar click on “סדנאות שף צער”

Actual result:

The “סדנאות שף צער” page is displayed in the same tab

Expected result:

The “סדנאות שף צער” page should be displayed in a new tab when clicked on

Environment:	Browser: 1. Chrome 120.0.6099.130 2. Firefox 121.0 3. Edge 120.0.2210.121 Resolution: 1. 4096 x 2160 2. 1920 x 1080 3. 1600 x 900		
Severity:	S3 - Major		

Description

Steps to Reproduce:

1. Open URL <https://www.dominos.co.il/>
 2. On the navigation tab click on "ערכיהם תזונתיים"
 3. Scroll to the bottom and notice how long the page is even with limited information
- Actual Result:**
4. There is a lot of scrolling and the images are too large so the page is busy and uncomfortable
- Expected Result:**
- A smaller resolution so that it will be a lot more appealing and easier to see/use

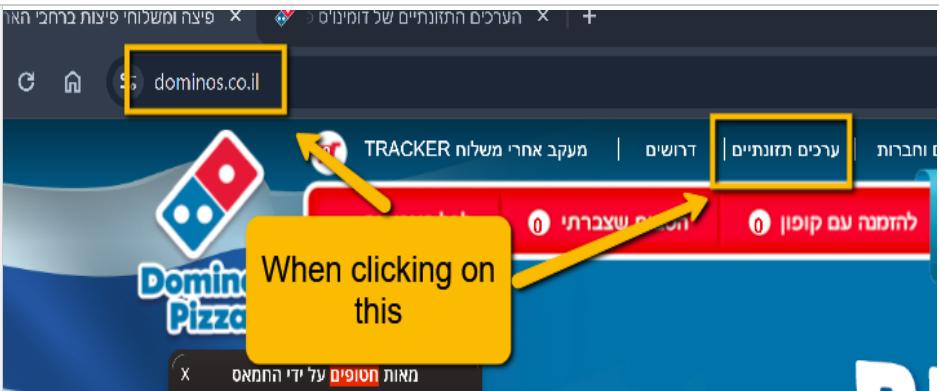

[DP-10] The link for "ערכיהם תזונתיים" opens the wrong page Created: 11/Jan/24 Updated: 14/Jan/24

Attachments:	 <p>The screenshot shows the Domino's Israel website. At the top, there is a navigation bar with the Domino's logo, a search bar containing the URL 'dominos.co.il/הצהרת- נגישות', and a red button labeled 'ד הפייה' (Delivery). Below the navigation bar, the main content area has a dark background with white text. A yellow callout box points to the word 'גבעתים' (coupons) in the middle of the page, which is misspelled as 'גבעתים'. The correct spelling 'גביעתים' is highlighted in a yellow box at the bottom right of the page. The entire screenshot is framed by a yellow border.</p>
Severity:	S3 - Major

Description

Steps to reproduce:

1. open URL <https://www.dominos.co.il/>
2. On the bottom of the page click on “הצהרת נגישות”
3. Scroll down until you get to “בורוכוב”
4. Notice the phone # and Email address in black

Expected result:

Everything should be spelled correctly and easy to read

Actual result:

Misspelled **גביעתים** (should be **גביעתים**)

--------------	--

The screenshot shows the official website of Domino's Pizza in Israel (dominos.co.il). A yellow arrow points from the URL bar at the top left to the Domino's logo, which is highlighted with a yellow box. Another yellow arrow points from the main menu bar to a large yellow box containing the text "DEAD LINK". Below the main content area, there is a green button labeled "יעגול לטבונה - אורי יזרעך" and a blue icon representing accessibility.

Below this, another yellow arrow points from the URL bar of a new tab to a PDF document titled "superbrandsList2022.pdf". The PDF page displays a list of various brands under the heading "לאכול / לשות בחו" (Food / Drink Abroad). The list includes well-known international brands like TAMPAX, Dr. Feirer Alkaline, Zilkin, L'Oréal, Selsun Blue, Pantene, Pampers, Maybelline, KFC, McDonald's, rebar, Arroma, Acqua, and Colgate. At the bottom right of the PDF page, the text "מקס ברנר" is visible. The entire screenshot is framed by a thick black border.

Severity:	S3 - Major

Description

Steps to reproduce:

1. Open URL to <https://www.dominos.co.il/>
2. On the bottom of the page click on “סופר-ברנדס”

Actual result:

The link does not work you cannot click on it

Expected result:

go to סופר-ברנדס webpage (<https://www.superbrands.co.il/superbrandsList2022.pdf>)

[DP-3] The link "דרושים" opens in the same tab when it should open in a new tab
